Welcome to MEAM! Here are some recommendations for your first semester in college.

**Required courses for MEAM majors:**

- **MEAM 110 Intro to Mechanics** and **MEAM 147 Intro to Mechanics Lab**

  These courses teach the fundamentals of mechanics from an engineering point of view. (Physics 150 also fulfills both of these requirements).

  **What are students saying about MEAM 110 and MEAM 147?**

  “It was nice to study physics with problems that were related to engineering.”

  “Combined, the two courses make for an excellent pairing, simply because it really helps to see formulas and theory in lecture and then apply that knowledge in actual hands-on demonstrations in lab.”

  **AP Credit:** A score of 5 on the Mechanics C exam fulfills the MEAM 110 requirement (it will appear as PHYS 093 on your transcript). You must still take MEAM 147.

  **A Levels:** An A grade fulfills both the MEAM 110 and MEAM 147 requirements.

- **MATH 104 Calculus I**
  
  [section 7 is strongly recommended; it is tailored to SEAS students] OR
  
  **MATH 114 Calculus II**

  A firm foundation in math is very important – please don’t skip ahead to MATH 114 unless are confident in your MATH 104 skill set.

  **AP Credit:** A score of 5 on the BC exam fulfills the Math 104 requirement.

  **Math Department Website:** [http://www.math.upenn.edu/ugrad/transfer.html](http://www.math.upenn.edu/ugrad/transfer.html)

- **CHEM 101 General Chemistry I**
  
  [Sections 4 & 5 are recommended; they are tailored to SEAS students] and
  
  **CHEM 053 General Chemistry I Lab**

  We suggest taking Chemistry and its lab in the fall semester since there are many sections offered. However, if it doesn’t fit in your schedule, it’s fine to take it in the spring.

  **AP Credit:** A score of 5 on the exam fulfills the Chem 101 requirement (it will appear as CHEM 091 on your transcript). You will still need to take CHEM 053 (lab).

  **IB Exam:** A score of 6 or 7 on the exam fulfills the Chem 101 requirement (it will appear as CHEM 091 on your transcript). You will still need to take CHEM 053 (lab).

  **A Levels:** An A grade fulfills the CHEM 101 requirement (it will appear as CHEM 091 on your transcript). You will still need to take CHEM 053 (lab).
What else should I take?

Take an elective in the College to add a bit of variety to your schedule, such as one of the following:

<table>
<thead>
<tr>
<th>Social Science &amp; Humanities:</th>
<th><a href="http://www.seas.upenn.edu/undergraduate/handbook/courses/ssh-breadth.php">http://www.seas.upenn.edu/undergraduate/handbook/courses/ssh-breadth.php</a></th>
</tr>
</thead>
<tbody>
<tr>
<td>Writing Requirement:</td>
<td><a href="http://www.seas.upenn.edu/undergraduate/handbook/courses/writing-requirement.php">http://www.seas.upenn.edu/undergraduate/handbook/courses/writing-requirement.php</a></td>
</tr>
</tbody>
</table>

If you still have room in your schedule, consider...

★ ENGR 105 Intro to Scientific Computing

This course fulfills the MEAM programming requirement. It teaches programming using Matlab. It is also offered in the spring. If you have AP credit for CIS 110, you do not need to take this course because your MEAM programming requirement is satisfied; however, you may want to take it anyway since the use of Matlab is so deeply integrated into the MEAM curriculum.

What are students saying about ENGR 105?

“ENGR 105 was useful because it helped me learn the syntax. I used that knowledge later on. Solving problems in a different language is really useful to learn.”

“Extremely useful. We used Matlab every semester since we took this class.”

★ MEAM 101 Intro to Mechanical Design

A project-based elective that covers the basics of the design process, from the initial idea, all the way to fabrication. Students learn computer-aided design (SolidWorks) and rapid prototyping (laser cutter and 3D printing). It is also offered in the Spring. This course is a recommended prerequisite for the popular course MEAM 201, Machine Design and Manufacturing.

What are students saying about MEAM 101?

“Great class, the projects are fun and interesting, and valuable skills are learned, especially in SolidWorks. Great for any engineering major, not just MEAM.”

“Since this course was based primarily on the learning and use of SolidWorks, I felt that I was truly learning something that would be useful to me in the future.”

Try to maintain a balanced course load of about 5 or 5.5 CUs each semester.
Support

The first semester of college can be tough. Even those who sailed through high school can find themselves overwhelmed at times. Don’t be afraid to reach out for support!!

★ Orientation Peer Advisor: [www.seas.upenn.edu/undergraduate/freshman/peer-advising.php](http://www.seas.upenn.edu/undergraduate/freshman/peer-advising.php)

★ Undergraduate Coordinator:

Desirae Johnson
Towne Building, Room 229
Hours: 9am-5pm, Monday-Friday
desirae@seas.upenn.edu
Tel: 215-898-4825

If you have a question and don’t know who to ask, send her an email and she will help you!

★ MEAM faculty advisor: [www.me.upenn.edu/about-people/index.php](http://www.me.upenn.edu/about-people/index.php)

The name and e-mail address of your faculty advisor were sent to you via email and are available on your PURL page and in Penn InTouch.

★ Counseling And Psychological Services

[www.vpul.upenn.edu/caps/](http://www.vpul.upenn.edu/caps/)
133 South 36th Street, 2nd Floor
Hours: 9am - 5pm, Monday - Friday
Tel: 215-898-7021

★ Tutoring Center

220 South 40th Street, Suite 260
Office Hours: 9am - 5pm, Monday – Friday
Tel: 215-898-8596

★ Weingarten Learning Resources Center

[http://www.vpul.upenn.edu/lrc/](http://www.vpul.upenn.edu/lrc/)
Stouffer Commons, Suite 300
3702 Spruce Street
Office Hours: 9am - 5pm, Monday – Friday
Also open for extended study hours on Sundays from Noon to 5:00 p.m. and Mondays through Thursdays from 9 a.m. through 9 p.m.
Tel: 215-573-9235
